Subject minor point

Here is a copy of the fax that was sent with the judgment that was faxed to you Sunday....I apologize for the timing..it escaped my attention...nevertheless, despite the request, I received no call or fax from you Monday before you returned my call after receiving a second copy of the fax.

None of this is really the point...the order is meant to dismiss all complaints in the case and render moot any outstanding motions. It was my interpretation of J. Hughes' comments that he wished to write the preclusion order himself...if I misinterpreted, Judge, you have my apologies.

None of Jakarain's changes and silly additions have any effect on the order and he has been so advised...As I told you, I wrote the best order I could and still get my client to sign. I disavow any changes he made after my submission to him.

If you still have any problems with me, please contact me personally

Thank you,  
Andrea
